

SPLICE TRAY

Cleerline stackable fiber splice trays are designed to safely route and store optical fiber and splices. Each tray features 2 dual layer splice holders allowing up to a total of 24 fiber splices to be inserted and organized. Trays are designed for patch/splice combination and splice panels, featuring self-stacking points to add additional trays allowing expansion beyond 24 fibers. Each tray features tie down points and includes zip ties to secure incoming cabling. A fiber legend is also included for documentation of up to 24 fibers.

Cleerline splice trays are compliant to Telecordia TM GR-769 splice organizer assemblies for optical fibers. The sturdy enclosure provides protection and organization for the completed fiber splices.

FEATURES AND BENEFITS

- Standard fixing points
- Ample slack storage space
- Fiber wire management points
- Fiber documentation sticker
- Dual layer splice holder, stackable
- Removable hinged lid for easy access
- Stackable with three point self-securing features

SPLICE SLEEVES

40/60mm splice sleeves with built in stainless steel rod for additional support for the spliced fiber. The dual tube design both protects the splice and seals it from the environment. 2.5mm x 40mm splice sleeves provide superior protection for the spliced fibers

FEATURES AND BENEFITS

- Mechanical and environmental protection
- Transparent heat shrinkable tube
- Short installation cycle
- Hot melt adhesive
- Designed for simple fiber entrance

PART NUMBER	DESCRIPTION
SST-24F	Splice Tray, dual layer, max core 24 fibers
SS-40-250	50 pack, 40mm splice sleeve, 1.5mm, Inner Dia 0.4mm
SS-40-900	50 pack, 40mm splice sleeve, 2.0mm, Inner Dia 1.0mm
SS-60-900	50 pack, 60mm splice sleeve, 2.5mm, Inner Dia 1.6mm
