

Safety and Certifications

Dear Valued Customer:

Thank you for choosing SunBrite. We're honored that you've chosen us to be a part of your outdoor experience.

At SunBrite, we've been developing and building the finest outdoor TVs since 2005 with the singular goal of delivering the best possible outdoor experience—to bring people together to share in the latest sports and entertainment while also enjoying all that the outdoors have to offer.

To ensure you receive the latest updates from SunBrite, please register your TV at this web address:

www.sunbrite.com/support/product-support/product-registration

If, for any reason, you are not completely satisfied with your SunBrite TV, please let us know. Your experience is of the utmost importance to us, and we don't take it lightly. Reach our team of experts Monday through Friday from 9:00 am – 6:00 pm Eastern at 866-357-8688.

Again, thank you for choosing a SunBrite premium outdoor television. We know you had options, and we're grateful you chose us to help you create new experiences with your friends and family.

—The SunBrite Team

Recycling

SunBriteTV operates a free mailback recycling program for consumers.

For more information on how to recycle your TV, please visit <https://www.sunbrite.com/support/recycling-programs> or contact customer service at 866.357.8688.

 	<p>CAUTION</p> <p>RISK OF ELECTRIC SHOCK DO NOT OPEN</p>	 	<p>The lightning flash with arrow-head symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.</p> <p>The exclamation point within a triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.</p>
<p>CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.</p>			

CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

WARNING: FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

CAUTION: This product satisfies FCC regulations when shielded cables and connectors are used to connect the unit to other equipment. To prevent electromagnetic interference with electric appliances such as radios and televisions, use shielded cables and connectors for connections.

CAUTION: THE POWER SUPPLY CORD IS THE MAIN DISCONNECT DEVICE; ENSURE THAT THE SOCKET-OUTLET IS LOCATED/INSTALLED NEAR THE EQUIPMENT AND IS EASILY ACCESSIBLE.

CAUTION: Only plug this device into a system that has ground fault current interruption (GFCI) and a residual protective device (RCD) with a rating of 30 mA or lower. The rated current for the power system must not exceed 20 A.

INFORMATION:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 12 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced technician for help.

FCC Compliance Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Important: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator and your body.

Industry Canada Statement

This Class B digital apparatus complies with CAN ICES-003(B)/NMB-3(B)

Important: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

IC Radiation Exposure Statement: This device complies with IC RSS-210 rules; Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept interference received, including interference that may cause undesired operation.

Important Safety Instructions

This product has been engineered and manufactured with the highest priority on safety. However, improper use can result in electric shock, fire, and/or damage to the unit. To prevent danger and prolong the service life of your SunBrite, observe the following instructions when installing, operating, and cleaning.

- Read and follow these instructions.
- Keep these instructions for future reference.

Notes to the Installer

Article 810 of the US National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

Article 820 of the US National Electrical Code provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

If an outside antenna is connected to the television equipment, be sure the antenna system is grounded to provide some protection against voltage surges and built-up static charges.

Do not touch the controls other than as described in the operating instructions. Improper adjustments of controls not described in the instructions can cause damage, which can require extensive repair work by a qualified technician.

Installation

Contact a professional installer if you have any doubts about your ability to safely mount your television.

- Ensure that the wall or ceiling where you are mounting the television is appropriate. Some mounts are not designed to be mounted to walls and ceilings with steel studs or cinder block construction. If you are unsure, contact a professional installer.
- Ensure the screws used to attach the TV seat at least 15mm into the TV's casing.

Only use attachments and accessories specified by the manufacturer.

- Do not place the product on an unstable cart, stand, or table.
- When moving the TV by cart, use caution to avoid a tip-over.
- When mounting the TV on a wall or ceiling, install the product according to the method recommended by the manufacturer.

Carrying the television requires at least two people.

- When transporting the TV, do not put pressure on the display. Carry the TV by holding the casing with both hands.

All televisions must be installed according to the manufacturer's recommendations. Televisions that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests, carts, etc., may fall over, resulting in injury.

- Never allow children to climb on or play on the television or the furniture on which the television is placed.
- Never place a television on furniture that can easily be used as steps, such as a chest of drawers.
- Install the television where it cannot be pushed, pulled over or knocked down.

Many new television buyers move their older CRT televisions into a secondary room after the purchase of a flat-panel television. Take special care in the placement of older CRT televisions.

- Always place your older CRT televisions on furniture that is sturdy and appropriate for its size and weight.
- Ensure your older CRT television does not hang over the edge of your furniture.

Do not mount SunBrite near a motor or transformer where strong magnetism is generated as this distorts the image and color.

Power

SunBrite must operate from the power source indicated on the specification label.

- If you are not sure of the type of power supply used in your home, consult your dealer or power company.
- When using the TV outdoors, you must use a GFI-protected AC outlet with an "in-use" waterproof cover.

Keep the power cord safe.

- Do not defeat the safety purpose of the polarized or ground-ing-type plug. If the provided plug does not fit into your outlet, consult an electrician to replace obsolete outlet.
- Check that the cords are well seated.
- Route the cord so that people cannot step on or trip over it.
- Protect the power cord from being pinched, particularly where it enters the wall or unit. Do not place the cord under the TV set or other heavy items.
- Unplug this apparatus during lightning storms or when unused for long periods of time.

Do not overload wall outlets, extension cords, or integral convenience receptacles.

Do not display a still picture for a long time, as this can cause an afterimage to burn in to the screen.

Ventilation & Temperature

For adequate ventilation, keep at least 1.5" of space on all sides.

- Maintain adequate ventilation to protect the television from overheating. Do not block any ventilation openings.
- Do not install inside an enclosure, kiosk, etc.
- Do not place the product on a bed, sofa, rug, or similar surface.

When the unit is used in a low temperature space, the picture may leave trails or appear slightly delayed. This is not a malfunction, and the unit will recover when its temperature returns to normal.

- Do not leave the unit in an extremely hot or cold location. Storage temperature: -24°F to +140°F (-31°C to +60°C).
- Do not leave the unit in a location exposed to direct sunlight.
- Do not install near any heat sources such as amplifiers, radiators, heat registers, stoves, or other apparatus that produce heat.

Water & Foreign Objects

The SunBrite can resist water exposure from normal rain, sprinklers, garden hoses, etc., but it is not waterproof.

- Do not place objects filled with liquids (e.g., vases) on the TV.
- Do not submerge SunBrite in water, not even partially.
- Do not pressure-wash SunBrite: SunBrite is not designed to withstand high-pressure water jets, or hurricane-type weather.

Foreign objects may touch voltage points or short out parts that could result in a fire, electric shock, or damage to the unit.

- Never push objects into this product through openings.
- Do not let objects of any kind fall into the television through ventilation holes.

General Operation

The front panel used in this product is made of glass. Therefore, it can break when the product is dropped or impacted.

The Liquid Crystal Panel is a very high technology product with 2,073,600 pixels, giving you fine picture details. Occasionally, a few non-active pixels may appear on the screen as a fixed point of blue, green, or red. This does not affect the performance of your product.

For added protection during a lightning storm, or when the SunBrite is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This prevents damage due to lightning and power-line surges.

WARNING: This product contains chemicals including Styrene which is known to the state of California to cause cancer, and Bisphenol A (BPA), which is known to the state of California to cause birth defects or other reproductive harm. For more

Do not place an outside antenna system in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits, as contact with them might be fatal.

Never place a candle or flame on top or near your SunBrite.

Preserve Your Eyesight

To reduce the eye strain and protect your vision when you watch your television, please take the following steps:

- Take regular and frequent breaks. Extended viewing may cause eye fatigue. We do not recommend watching for more than one hour without a break.
- Look away from the TV screen and focus on distant objects during the breaks for at least 10 minutes.
- Relax yourself during a break by doing eye exercises or outdoor activities.

The recommended viewing distance is to sit at least as far away as three times the vertical height of the screen.

Proper breaks and exercises relieve eye strain and fatigue.

Repair

Do not service SunBrite yourself: Opening the cover voids the warranty and exposes you to high voltage and other dangerous risks. Refer all servicing to a qualified service professional.

If any of the following conditions occurs, unplug the power cord, and call a qualified service professional to perform repairs:

- When power cord or plug is damaged.
- When objects have fallen into the product.
- If unit was submerged in water or pressure-washed.
- When product does not operate properly as described in the operating instructions.
- When the product has been dropped or damaged.
- When the product displays an abnormal condition. Any noticeable abnormality in the product indicates that the product needs servicing.

Replacement parts: Ensure that the service person uses replacement parts provided by SunBrite. Use of unauthorized parts can result in fire, electric shock and/or other danger.

Safety checks: Upon completion of service or repair work, ask the service technician to perform safety checks to ensure that the product is in proper operating condition.
